1. **Tell us about yourself and your life before IBM SkillsBuild.**
   Before joining IBM SkillsBuild, I use to get confused about where to start a particular subject and keep the learning pace going on. After exploring the IBM SkillsBuild, it became easier to navigate and to learn about a particular topic with a proper course path.

2. **How did you find IBM SkillsBuild and what made you join? Did you have any doubts or fears?**
   I came to know about IBM SkillsBuild through learning opportunities and decided to join because I wanted to improve my technical knowledge and develop skills for my future career. Initially, I was unsure about the platform, but after doing some course, I encouraged myself to take the opportunity and move forward.

3. **What did you learn during the program? Any specific moment, project, or mentor that stood out?**
   During the program, I learned about emerging technologies, digital skills, problem solving, and importance of continuous learning. Completing learning modules and working projects gave me practical knowledge and helped to continuously learn.

4. **How has your life changed after the program?**
   IBM SkillsBuild has helped me become more focused to technology specific topics, and changed my mindset towards learning, and motivated me for further opportunities.

5. **What would you tell someone hesitant to join?**
   I would tell anyone who is hesitant to join IBM SkillsBuild not to be afraid of starting because every small steps brings you closer to your dreams. Believe in yourself, and go for it.
